

Aman Kumar Shukla

Delhi-NCR, India | +91-9358176837 | realamanshukla@gmail.com | GitHub: realamanshukla | LinkedIn: realamanshukla

Summary

Results-driven Software Development Engineer & Full Stack Web Developer with hands-on experience in backend API development, full-stack applications, embedded systems programming, and scalable software engineering. Skilled in Python, Flask, C/C++, JavaScript, SQL, React.js, Docker, Git, and Data Structures & Algorithms.

Education

B.Tech, Computer Science & Engineering | Gautam Buddha University, Greater Noida | 2022–Present

Relevant Coursework: DSA, DBMS, Operating Systems, Computer Networks, TOC, Computer Architecture

Experience / Internships

Quick Pay Pvt. Ltd. — Full Stack Web Developer Intern | Mar 2026–Present

- Developed and maintained RESTful backend APIs using Python and Flask for Smart Lifebuoy project.
- Collaborated with frontend/product teams to improve feature delivery and application performance.
- Performed debugging, testing, and API validation for stable deployments.

AtharavTech Solutions — Software Development Engineer Intern | Sept 2025–Feb 2026

- Engineered performance-critical embedded firmware in C for drone and security hardware systems.
- Optimized memory utilization and execution speed using efficient algorithms and data structures.
- Contributed to full-stack development, debugging, code reviews, and software testing.

IIT Roorkee — Virtual Labs Development Intern | June 2025–July 2025

- Developed IITR-BioSim, an interactive ECG simulation platform for browser-based learning.
- Implemented real-time waveform visualization and backend processing workflows.

IEEE IC3ECSBHI — Student Organizer | Jan 2025–Apr 2026

- Managed website and conference portal operations; coordinated 60+ volunteers across teams.

Projects

Influencer Engagement & Sponsorship Coordination Platform | Flask, SQLAlchemy, MySQL, JavaScript

- Developed a full-stack marketplace connecting brands with influencers.
- Implemented authentication, role-based dashboards, CRUD workflows, and responsive UI.

IITR-BioSim ECG Simulation Platform | HTML, CSS, JavaScript, Python

- Built browser-based biomedical simulation tool for ECG waveform visualization.

Skills

Languages: C, C++, Java, Python, JavaScript, SQL

Frontend: HTML5, CSS3, Bootstrap, React.js, Vue.js

Backend: Flask, Django, REST API Development

Databases: PostgreSQL, MySQL, SQLite

Tools: Git, GitHub, Docker, Linux, VS Code

Core CS: DSA, OOP, OS, DBMS, Computer Networks, TOC
